

Energy Efficient, High-Intensity
Fluorescent Lighting Technology

Canopy

See the savings.

After –
Orion 100W Canopy Fixture

Before –
320W Metal Halide

Whether it's for work or recreation, outdoor lighting enables people to see essential detail so they can be active at night. Good lighting can enhance safety and security, emphasize features of architectural or historical significance, or call attention to commercial premises by means of area lighting or signs.

Your business.

With tight profit margins and fierce competition, you need every advantage to succeed. Orion has unique lighting technologies that are guaranteed to improve your bottom line.

Orion fixtures can provide the same or more quantity and quality of light at a much lower cost than either metal halide or LED.

What we do.

Nearly a billion dollars have been saved by Orion customers using our proprietary technology and systems to dramatically reduce energy waste. Recognized as an industry leader by some of the most prestigious organizations on the planet, Orion delivers real, guaranteed bottom-line results based on three principles:

- Energy Efficiency Without Compromise
- No Financial or Technological Risk
- Improve Bottom-Line and Environment

No one else can offer the guaranteed savings or PDLR (Permanent Distributed Load Reduction) that Orion Energy Systems provides using its proprietary, integrated technologies and energy management systems. Orion can even implement without it being a capital expense with its patent-pending business model.

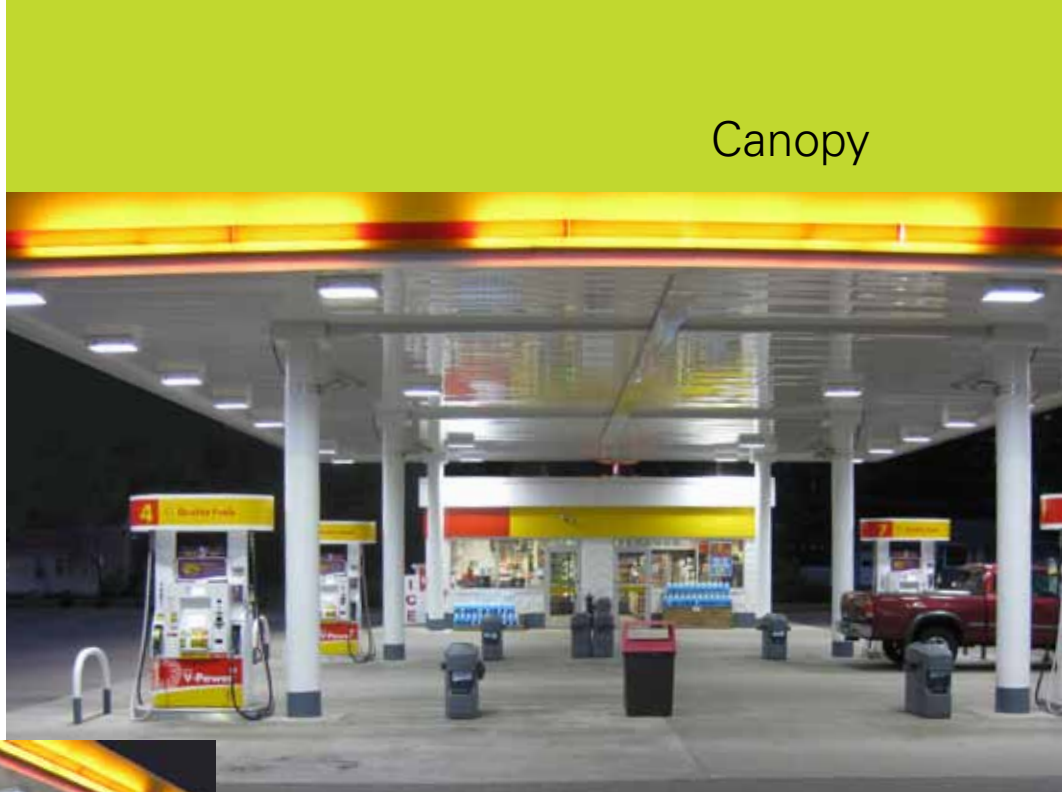

Annual Impact

Trig's Shell Stations –
6 locations in Wisconsin

Financial Savings \$27,626

Energy reduction 276,328 kWh

CO2 reduction 183 tons

Muti-level Success

“Our goals are to save energy and reduce the environmental impact on everything we do – not only for our customers and ourselves, but to help create a better, sustainable world for our children and grandchildren, too.

We now have more efficient lighting that is costing much less to operate and is helping to reduce our impact on the environment.

The ease of maintenance with the new fixtures, two year payback, professional project management, quality of the service and products are everything we hoped for. I am very pleased with what Orion has done for our company.”

Lee Guenther - President & CEO, T.A. Solberg

Orion has an entire family of energy efficient exterior lighting technology.

Energy Efficient, High-Intensity Fluorescent Lighting Technology

Energy. Smarter.™

Orion Energy Systems leads the way with extreme energy efficiency, with everything from photovoltaic, daylighting, LED, high-intensity fluorescent lighting for interior and exterior, wireless control systems, thermal storage, and wind. Since 2001, Orion delivered these results:

- \$856 million saved by our customers
- 500 MW permanently displaced from the electrical grid (roughly equal to a traditional coal powerplant)
- 11.1 billion kWh saved
- 7.3 million tons of CO₂ prevented from entering the atmosphere
- 120 of the Fortune 500 are customers

Call **877.204.7540** today and learn how you can dramatically reduce your energy costs - without compromise or risk.
